that’s me!

Marla Lise is the earthling running The Eco Chapter.

With over two decades of experience in the conservation, education, and sustainability fields, Marla is a global educator, eco-literary advocate, and good faith communicator. With a deep love for nature and the planet, she uses words as catalysts to drive systemic change.

Sitting at the intersection of language and science, her work bridges the gap - making complex concepts accessible to many. She is working towards building a world of understanding, communication, reciprocity, and connection through her company The Eco Chapter.

She is the editor and co-author of the book, Dreams of Unwritten Futures, which is the first book in what she hopes to grow into the Better Future Narratives project.

The Eco Chapter was born in June 2023 from a simple belief:
that words, education, and imagination can help shape a better future.

Since then, our journey has been a kaleidoscope of panels, talks, workshops, partnerships, and writing - each one an opportunity to spark reflection, inspire action, and reconnect people with the possibility that things can be better.

For us, impact begins with people - the conversations sparked, perspectives shifted, communities strengthened, and futures reimagined through connection, education, and story.

This first Impact Report brings together the work we have accomplished since our beginning. It is both a reflection of what has been created so far, and a reminder that meaningful change often starts with small conversations, quiet ideas, and people willing to challenge current unsustainable narratives.

At a time when many future narratives feel heavy with uncertainty,
The Eco Chapter exists to hold space for something different:
hope, regeneration, and collective imagination.

We believe a better world is still possible but it requires courage, action, and community.

We hope this report assures you to keep believing in that better future, and empowers you to believe that you can play a role in creating it.

To know that you are not alone in your journey.

In service of our planet,
Marla Lise
Founder
The Eco Chapter

The Eco Chapter exists to address a key gap: the role of language in responding to the polycrisis.
We are living through interconnected crises: climate change, biodiversity loss, inequality, and systemic instability.
Naming this as a polycrisis helps clarify the scale and interconnected nature of the challenge.
A second gap remains: the space between awareness and action.
Many care, but feel overwhelmed or unsure how to engage meaningfully.

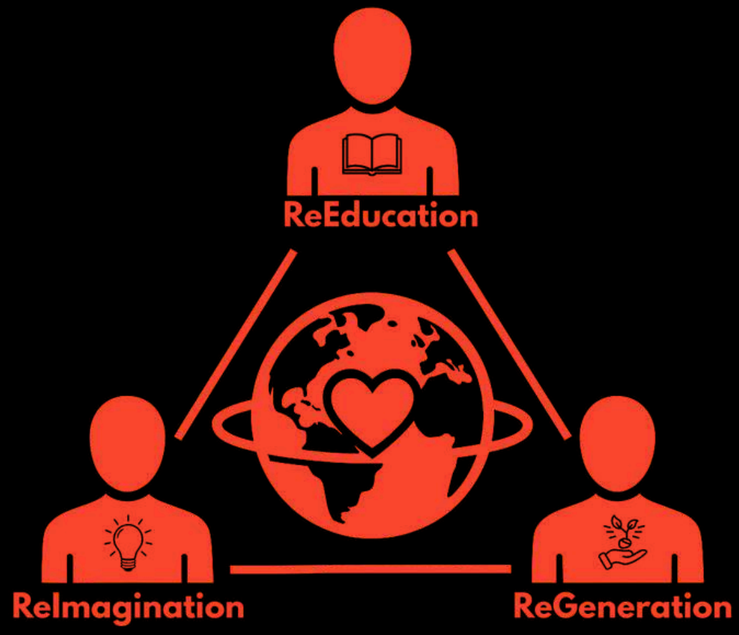

Language sits at the centre of these gaps.
It shapes how we understand complex systems, what we prioritise, and whether action feels possible or not.
The Eco Chapter works at the intersection of sustainability, education, and communication
- helping translate complex ecological issues into clearer, more human understanding.

As an ex-Sustainability Manager, certified English language teacher, with an Honours degree in Animal Science,
a Master's in Environmental Science, and a postgraduate certificate in Education,
I saw how often scientific knowledge fails to translate into real-world understanding and decision-making.
Through language, storytelling, and eco-literacy, The Eco Chapter supports individuals and organisations in turning awareness into meaningful engagement and informed action.

Today, The Eco Chapter is an eco-literacy and regenerative storytelling consultancy.
Empowering change through eco-literary advocacy.

It works through a three-pronged approach:
REEDUCATION through Eco-Literacy: Learn the Foundations
REIMAGINATION through Consulting: Explore Better Futures
REGENERATION through Storytelling: Showcase Impact and Purpose

This first report shares where we've made progress, and the ongoing challenges of writing better future narratives through environmental education, storytelling, and sustainability.

Because in a time of ecological and social uncertainty, the future of our species depends on our ability to reimagine, reconnect, and build together.

Join us.

In 2023, The Eco Chapter was born as the eco-conscious arm of The English Curve, created to explore the relationship between language, education, and environmental awareness. By 2025, The Eco Chapter had evolved into its own independent entity and became a registered company - marking a new chapter of growth, purpose, and possibility.

We're cultivating an international collective of changemakers

Today, The Eco Chapter operates as a largely remote, location-agnostic consultancy, acting as a bridge between science and society, awareness and action, and across geographies and contexts.

This allows us to engage a wider range of people, expanding the conversation around the polycrisis and its potential solutions.

We are building a growing international collective rooted in sufficiency, reciprocity, and hope.

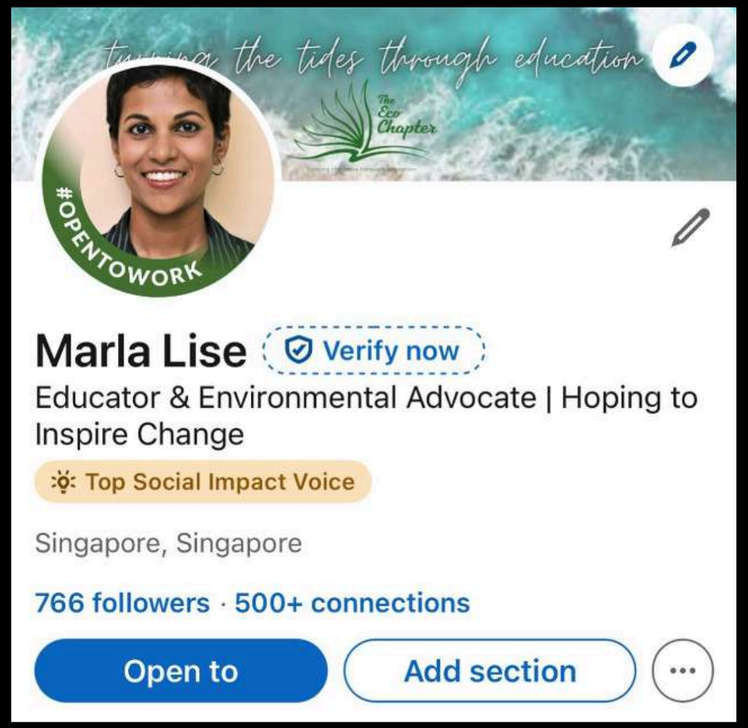

Top 3 Highlights

LinkedIn recognised us as a Top Social Impact Voice in 2024.

We were nominated for the New In Asia Editorial Fellowship, and awarded editorial fellow of the month in 2025.
In 2026, we are continuing as a Senior Editorial Fellow.

We were selected and sponsored to be a Fellow in the Bio-Leadership Project's last cohort of fellows in 2026.

Workshops

We believe education is a powerful tool for shaping the future. Through workshops, we bring conversations around the polycrisis, sustainability, and regeneration into communities, organisations, and classrooms - creating spaces where understanding can turn into meaningful change.

Since our birth,
we have become certified facilitators of the following globally recognised workshops and learning experiences:

Cards for Life
Deep Time Walk
Climate Fresk
Biodiversity Collage
Conscious Evolution Collage
Circular Economy Collage
Planetary Boundaries Fresco
En-ROADS
Nature’s Alchemy Cards

By 2025, we had facilitated more than 120 workshops, ready-made, bespoke, indoors and outdoors, along with a monthly eco book club.

We have been invited to create and facilitate indoor, outdoor, online, familiar, and bespoke workshops for organisations, schools, and events across different communities - including in Spain and Sri Lanka.

We started creating workshops for sale!

The first two have made it to Ireland and The Netherlands.

It was impressive to see the power of the group, the energy which opened up, and the ambition of the participants to take their role. Thanks Marla Lise from The Eco Chapter for designing this workshop all the way from Singapore.

Lieke Rijken

Circular Strategy & Innovation
Innoboost

Truly inspiring to bring Marla Lise's design on Climate Justice and Women in the Developed World workshop to life. We're all searching for how to talk about climate change—sharing urgency without losing hope. We explored how language and storytelling can drive action. How we talk about climate change shapes how we respond to it.

The Regenerative Vision session was quite impactful especially the Cards for Life activity. Marla guided me thoughtfully throughout and created a safe, supportive space that encouraged being truly honest with myself! Strongly recommend if you are looking to learn about regeneration.

We bring environmental education to communities around the world

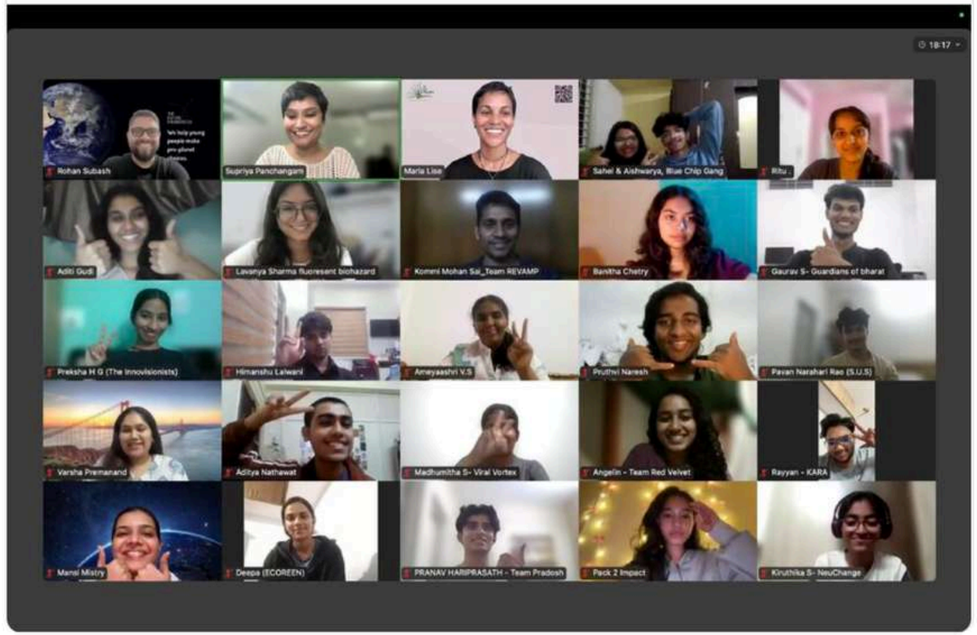

Our online workshops have welcomed participants from across the globe, creating spaces for shared learning, dialogue, and connection beyond borders.

From Singapore to South West Kerry!
After working with Marla on sustainability initiatives at The Ocean Race and seeing firsthand her genuine passion for communicating about the changing climate, I knew she'd be a perfect fit for curating one of the workshops we're hosting as part of the Skellig Coast Climate Literacy Festival.

Marla has a real gift for connecting with people—her warmth, creativity, and deep care for the planet shine through in everything she does. Bringing her experience as a Climate Fresk facilitator, she developed a workshop supporting young people to understand climate and the connections between industry, society and behaviour.
We will use this foundation to then work on a STEAM design challenge with participants
- all solutions-focused.

Marla's thoughtful approach and genuine enthusiasm remind us that meaningful climate action starts with human connection. I'm so grateful to have her involved and can't wait to see the impact her workshop will have on our community here in South West Kerry, Ireland.

Rebecca White
Co-Founder
Future Focus21c EDU

It was a joy to collaborate with Marla and how she shows up in the world is very much aligned to what my business champions, especially our first 3 values of Connection, Curiosity and Compassion. Communicating with her on the design and logistics of the session was always smooth.

Marla's style of facilitation is warm and welcoming and I was inspired by her use of Cards for Life to help guide the group in writing down how they felt to the different prompts.
It was really enjoyable to work with her and I'd love to collaborate again in the future.

Lisa Partridge

What Organisers and Participants Have to Say

Thank you, Marla Lise - it was great having you at the Royal Geographical Society–Singapore.
I knew from the start that your voice and vision needed to be heard, and I'm so grateful for your time and amazing work.
You had a powerful way of making the Anthropocene not just a concept, but a deeply human call to action.
Thank you for inspiring us to imagine - and co-create - a better world.

Montse Castells
Founder
The Wellness Hood

My wife and I very much enjoyed Marla Lise's AnthropOH NO! talk.
Marla is an engaging speaker, and the way she mixed humour, storytelling, and hard truths about the environment kept the whole room hooked.
It was thought-provoking without feeling heavy, and her energy made it genuinely fun to listen to.
We both came away feeling inspired — her call to action really stuck with us, reminding us that small, conscious choices can add up to something bigger.

Podcasts

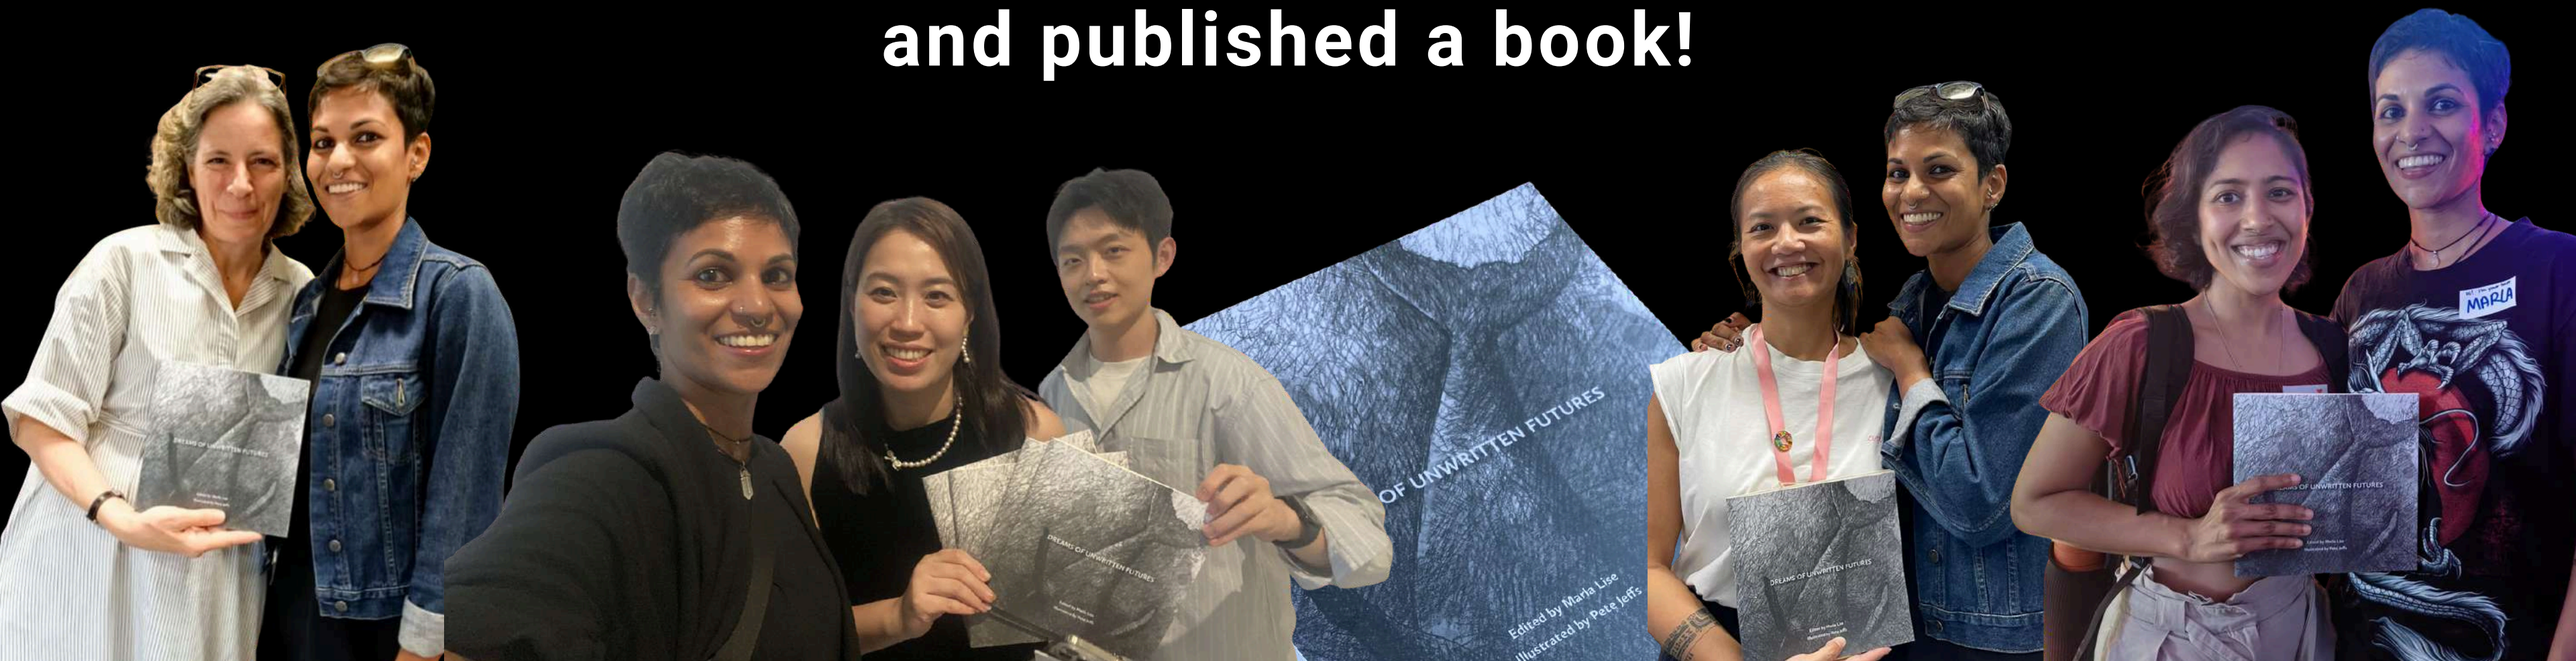

Gaia's Call 2.0 (reGeneration) is a podcast created with Brad Swift from North Carolina.
Together, we explore themes around the polycrisis and how it impacts young people, as well as the carers, educators, and systems that support them.
The series also features a range of guests who bring diverse perspectives into these ongoing conversations.
We are using this platform as a stage to amplify voices from around the world.
Currently our guests have been from Africa, Norway, North America, and Asia.

In 2026, we were also invited to speak on the Sustainably Talking podcast.

On top of having articles featured on international platforms and online magazines, being nominated for editorial fellow of the month by New in Asia, and writing over 150 articles on Substack with the most read article at 656 views, we co-authored a textbook and several journal articles.

Oh ... and we also co-authored, edited, and published a book!

How to Spot Greenwashing: When Sustainability Is Just a Sales Strategy

MARLA LISE / JULY 18, 2025 / SUSTAINABLE BUSINESS, SUSTAINABLE DEVELOPMENT

Sustainability has become a buzzword — a lifestyle, even. So much so that "sustainability specialists" now appear in every industry, many of them coming from backgrounds that have little to do with sustainability. Brands of all kinds market themselves as environmentally conscious, often showcasing a green logo, a healthy-looking leaf, or an "eco-friendly" tag. But what does sustainability really mean, and how to spot greenwashing in a world where almost every brand claims to be green?

INSIGHTS · CHAMPIONING CHILDHOOD

Nature-Deficit on an Island Nation: Rewilding Wonder for Singapore's Children

If you've only got a minute:

- Nature play is not a luxury. **Nature-deficit disorder** "contributes to a diminished use of the senses, attention difficulties, conditions of obesity, and higher rates of emotional and physical illnesses," and forms part of what experts call the **"epidemic of inactivity"** (source: Richard Louv, 2005).
- This disorder is rampant in Singapore. Channel News Asia states, "**46 per cent of youth do not go for nature walks at all**, while 23 per cent go for nature walks once every 10 weeks."
- At the same time, Singapore young people's mental health is worse than ever, with IMH reporting that **more than 1 in 5**

Rewriting the sustainability narrative

Marla Lise

Sustainability took off like a bat out of hell. In just a few years, it became the silver bullet

The great sustainability scramble

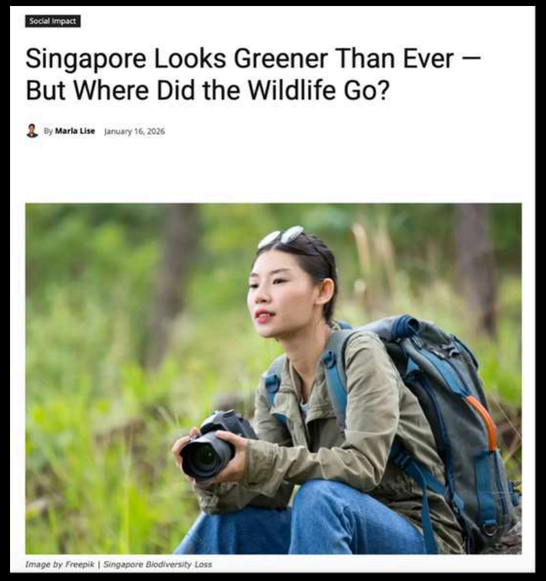

The race to establish sustainability as

The thing about Marla is that she can see sustainability for what it really is - and isn't afraid to call it out when it wears the emperor's new clothes. She has lived experience of sustainability at its most contrary, and I would encourage anyone who wants to know what the world of sustainability of is really like to read her op-ed, "Sustainability is a Hoax".

Marla's work is essential reading for sustainability professionals who are disillusioned with the industry, and are desperate to rediscover why they first jumped into this crazy, conflicted world in the first place. Her writing is an espresso shot after way too much wine.

Robin Hicks
Sustainability Journalist
Eco Business

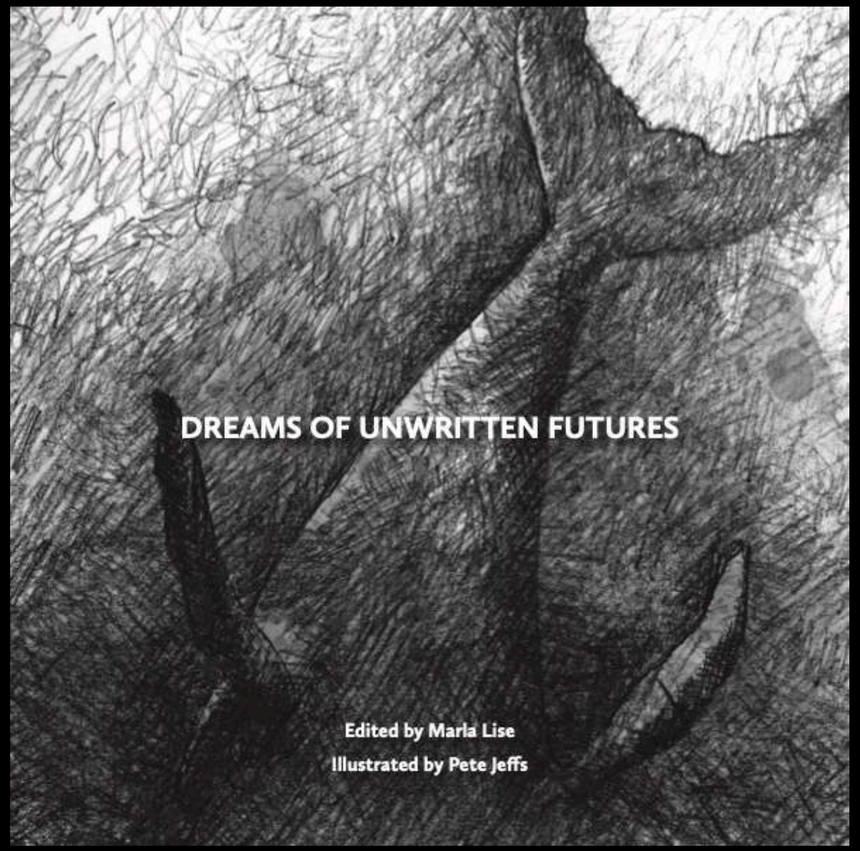

Marla Lise writes with clarity, compassion, and courage. Marla is a catalyst for change. She inspires readers to imagine a better way of being and encourages them to FEEL what the data means for our lives - whether we are business leaders, policymakers, individuals, or communities.
As she said recently: "We need to stop replacing one thing for another and instead restore, regenerate, reimagine. We need to rethink the entire world of sustainability - because it's clearly not sustainable. We have more than enough. We have everything we need."
This is precisely the kind of leadership the world needs right now. Thank you Marla for your clear, compassionate, and courageous work.

Donna Okell
CEO and B Leader
UK For Good

Dreams of Unwritten Futures was written by Felipe Soraires, Juana Riepenhausen, Marla Lise, Nick Lane, Viroshan Naicker and illustrated by Pete Jeffs - an international group of writers, dreamers, and better future advocates.

This book is the first in what we hope will be a series - each one an invitation to see the awe stitched into the fabric of everyday life.

These words remind us that success is not measured by what we accumulate, but by how deeply we are connected: to one another, to community, to Mother Earth herself.

We hope to write a series of books through the Better Future Narratives Project and are crowdfunding to publish the next edition.

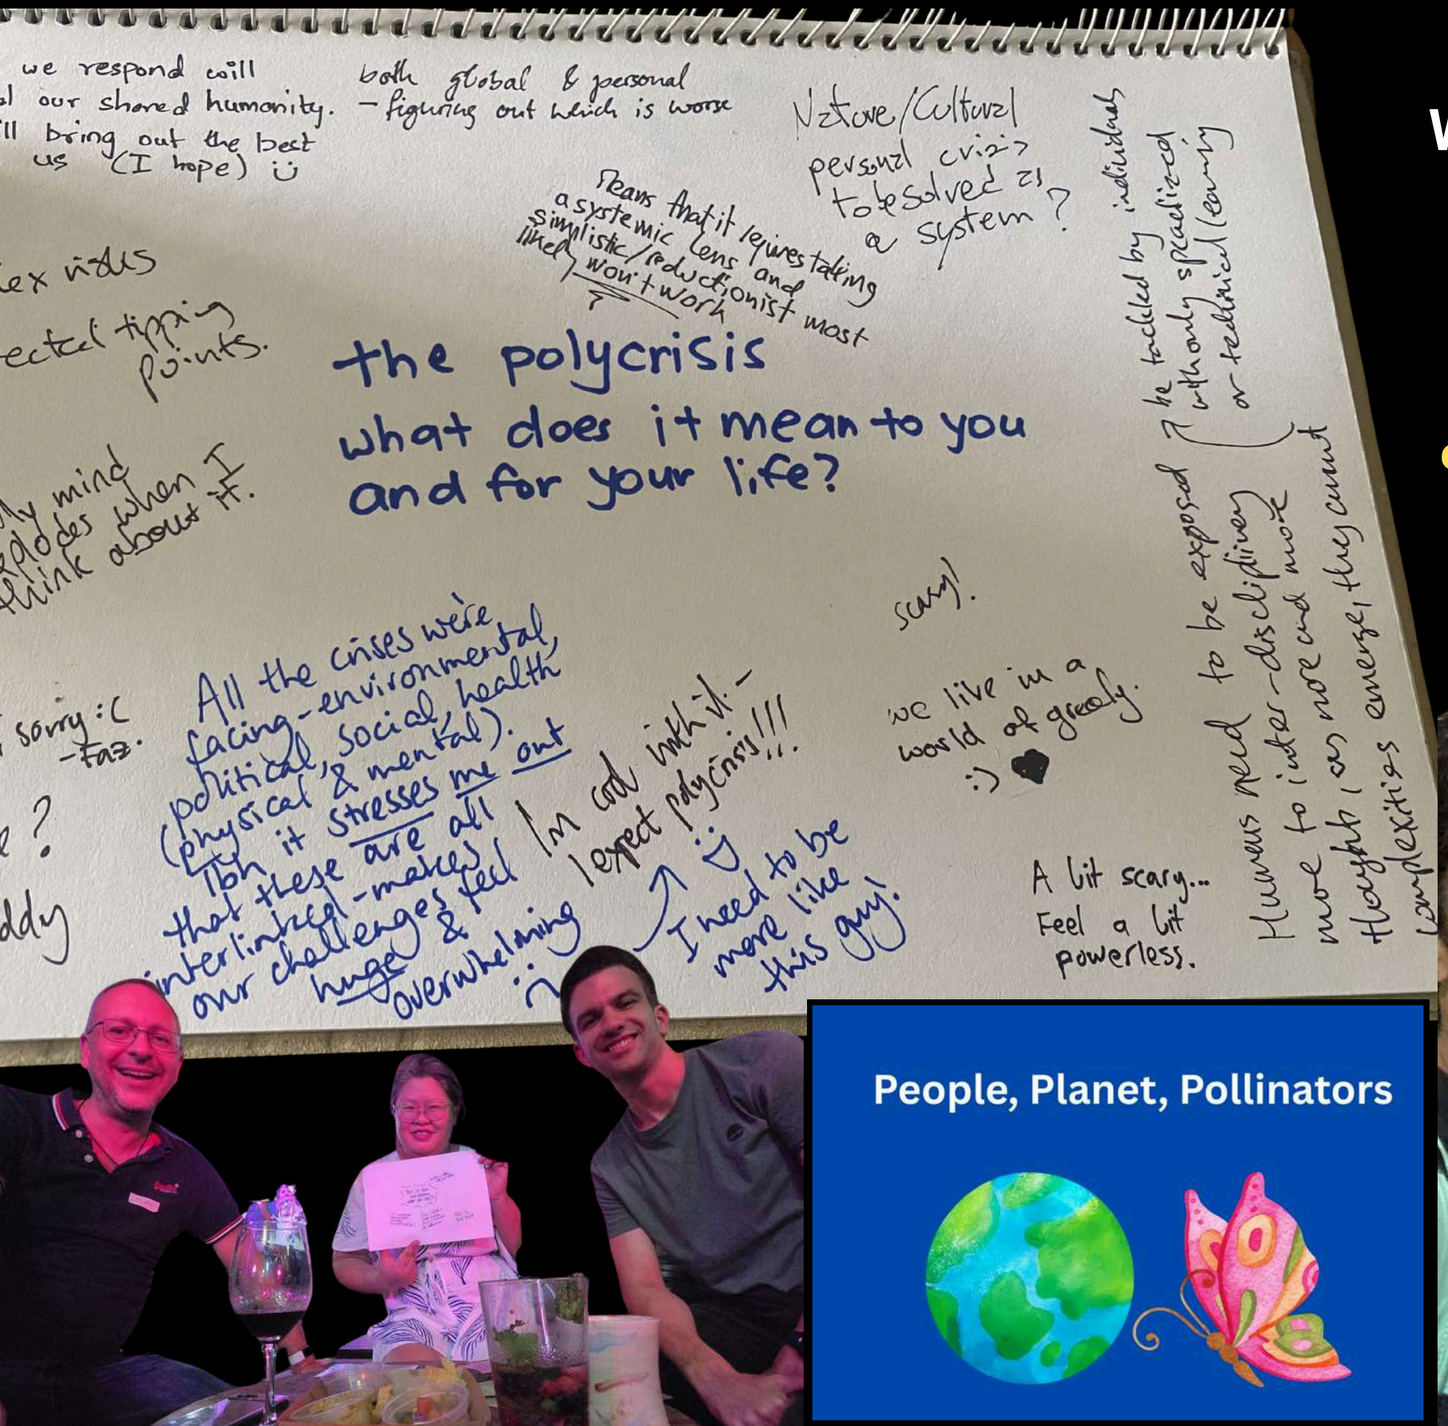

Community Building

**We believe that in the face of the polycrisis,
it is community - within organisations and beyond
- that holds us steady.
We are building life rafts through each gathering, each conversation, and each shared story.**

We hosted an average of 15 attendees every month since beginning People, Planet, Pollinators in January 2025.

PPP is a free monthly informal meetup where everyone is invited to discuss prepared topics relating to the polycrisis.

Mentoring

With over 20 years of experience in conservation, sustainability, environmental science, and storytelling, we believe that sharing knowledge and growing the next generation of changemakers is essential to our work.

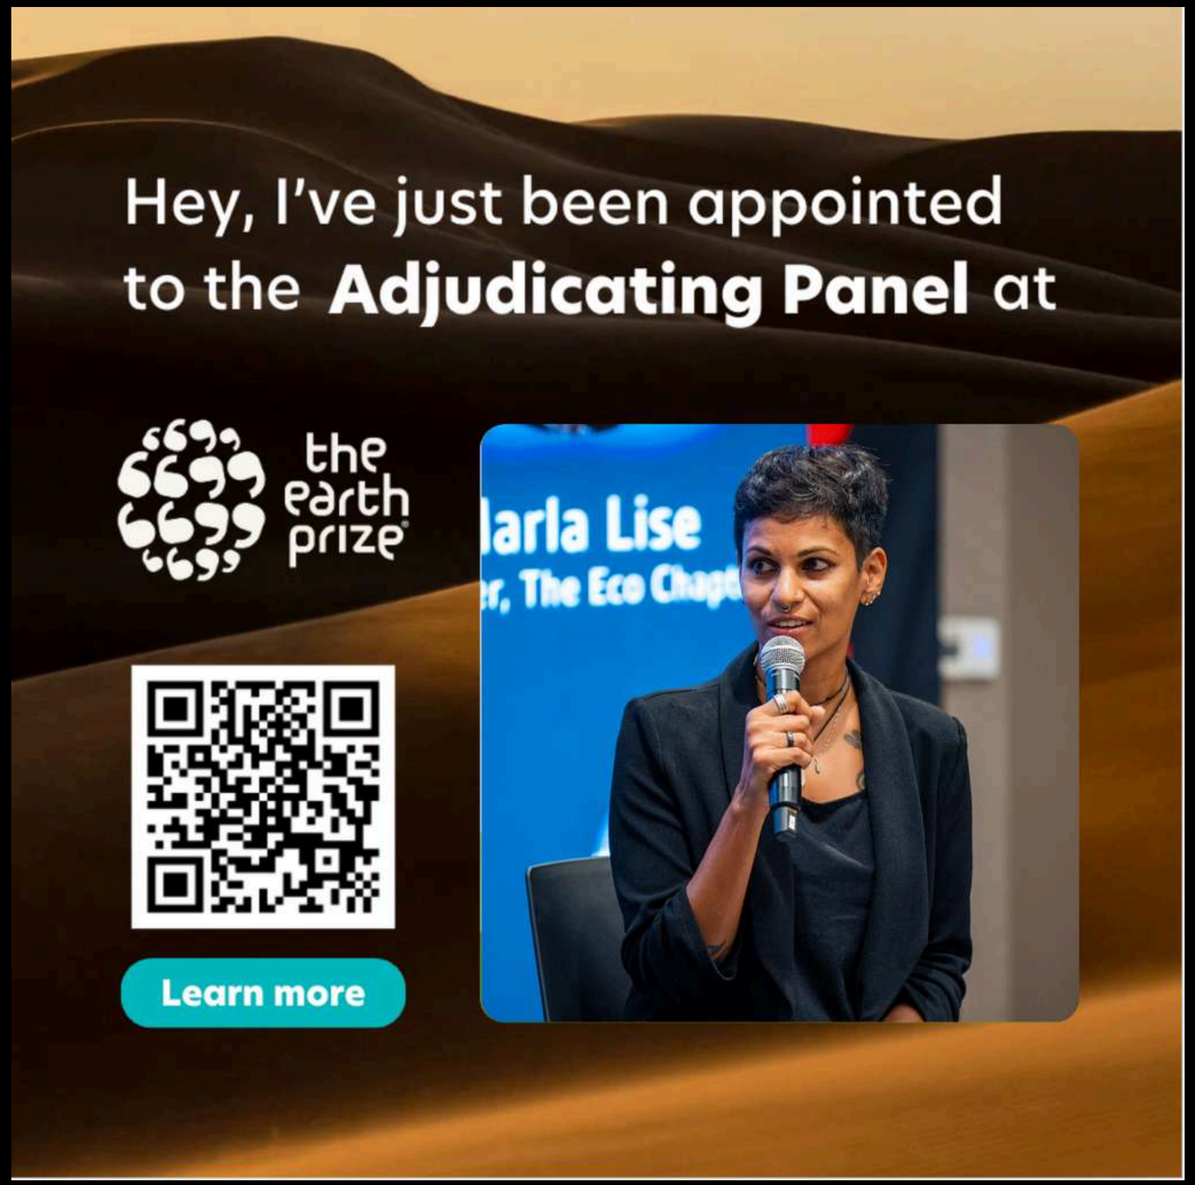

Marla was my mentor during the Magenta Mentorship Programme.
She was enthusiastic, very proactive, and quick to connect. She would listen attentively to my goals, give tangible advice, and always be there for me when I felt unsure about myself and my abilities. She supported me in applying for internships and always had a "go for it, try, you can do it" attitude, while also acknowledging real challenges and never dismissing my concerns.
She is incredibly supportive, treated me as an equal, and shared her knowledge in fields I wasn't very familiar with.

She would consistently send ideas, links, and resources my way that were closely aligned with my interests. She opened up the world of community-led conservation projects – which turned out to be exactly what I had been wanting to pursue. With her gentle care and guidance, I decided to set up my own advisory practice in what I do best.
I'm amazed by how much has shifted and fallen into place over the year, during a time when I was unsure how to move forward.

I highly recommend Marla, especially if, like me, you're trying to find your way!

Liza Kaluzhskaia
Founder
Metsameri

Marla has been such a special part of my sustainability journey. First as a workshop facilitator who encouraged deep reflection, then as the one who introduced me to Climate Fresk, and later as a mentor who guided me to become a Climate Fresk facilitator myself.
I've always admired the inclusive and open space she creates in her workshops, where everyone feels empowered to express themselves in a safe space and learn together.

She's deeply knowledgeable about many aspects of climate change, and her passion for biodiversity conservation is truly inspiring.

If you're looking for someone who genuinely walks the talk, Marla is your person.
There's no fluff with her, just authentic, actionable climate insight.
I'd wholeheartedly recommend her as a facilitator, moderator, and all-around awesome person to chat with about climate action and sustainability.

The Eco Chapter

Empowering change through eco-literary activism

2026

With sustainability often remaining in latent demand, The Eco Chapter is now focused on helping individuals, organisations, and companies prepare for the future.

In 2026, we launched five new offerings.

NEW • NEW • NEW • NEW • NEW • NEW •

Impact Consulting

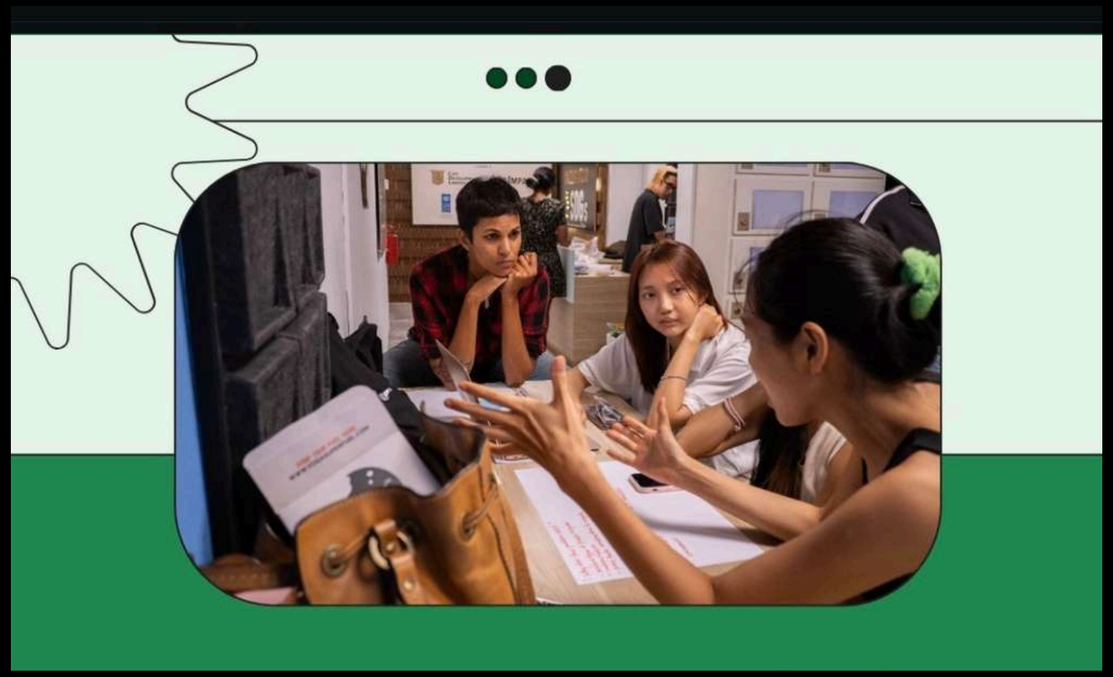

For purpose-led and eco-conscious brands looking to communicate their impact more clearly and credibly.

We help organisations craft ESG narratives, impact reports, and authentic sustainability stories that strengthen stakeholder trust, improve transparency, and help brands stand out in an increasingly impact-conscious world.

Our service enables clearer communication, stronger stakeholder engagement, professionally written impact materials, and storytelling that translates sustainability efforts into meaningful, credible narratives.

NEW • NEW • NEW • NEW • NEW • NEW •

Mentoring

For individuals transitioning into the environmental and sustainability sector, as well as young people beginning their careers in purpose-led fields.

We support the next generation of changemakers by building confidence, offering direction, and helping participants navigate pathways into meaningful, future-focused careers.

We offer 1:1 guided mentoring, clarity on career pathways, skills and confidence-building support, and practical guidance to access opportunities.

NEW • NEW • NEW • NEW • NEW •

Education for NGOs

We have worked as an education consultant, facilitator, and mentor for the International SeaKeepers Society (Asia) since 2017. From 2024–2026, we supported the launch and roll-out of the International Junior SeaKeepers Programme across global chapters.

We're looking to collaborate with NGOs, non-profits, and charities working in environmental education, leadership, and storytelling.

We offer strategic storytelling support, impact communication materials, and narrative development with clear, compelling stories that resonate with stakeholders and supporters.

NEW • NEW • NEW • NEW • NEW •

Research Storytelling

A storytelling service for universities and researchers that translates academic research into clear, accessible, and engaging narratives for wider audiences.

We help ensure important research reaches beyond academia by translating complex ideas into communication outputs that increase public understanding and strengthen engagement with stakeholders and wider audiences.

We have completed our first projects with Prince Songkla University in Thailand and University Malaysia Terengganu.

Faculty of Environmental Management,
Prince of Songkla University,
Hatyai, Songkhla 90110 Thailand

Apr 19, 2026

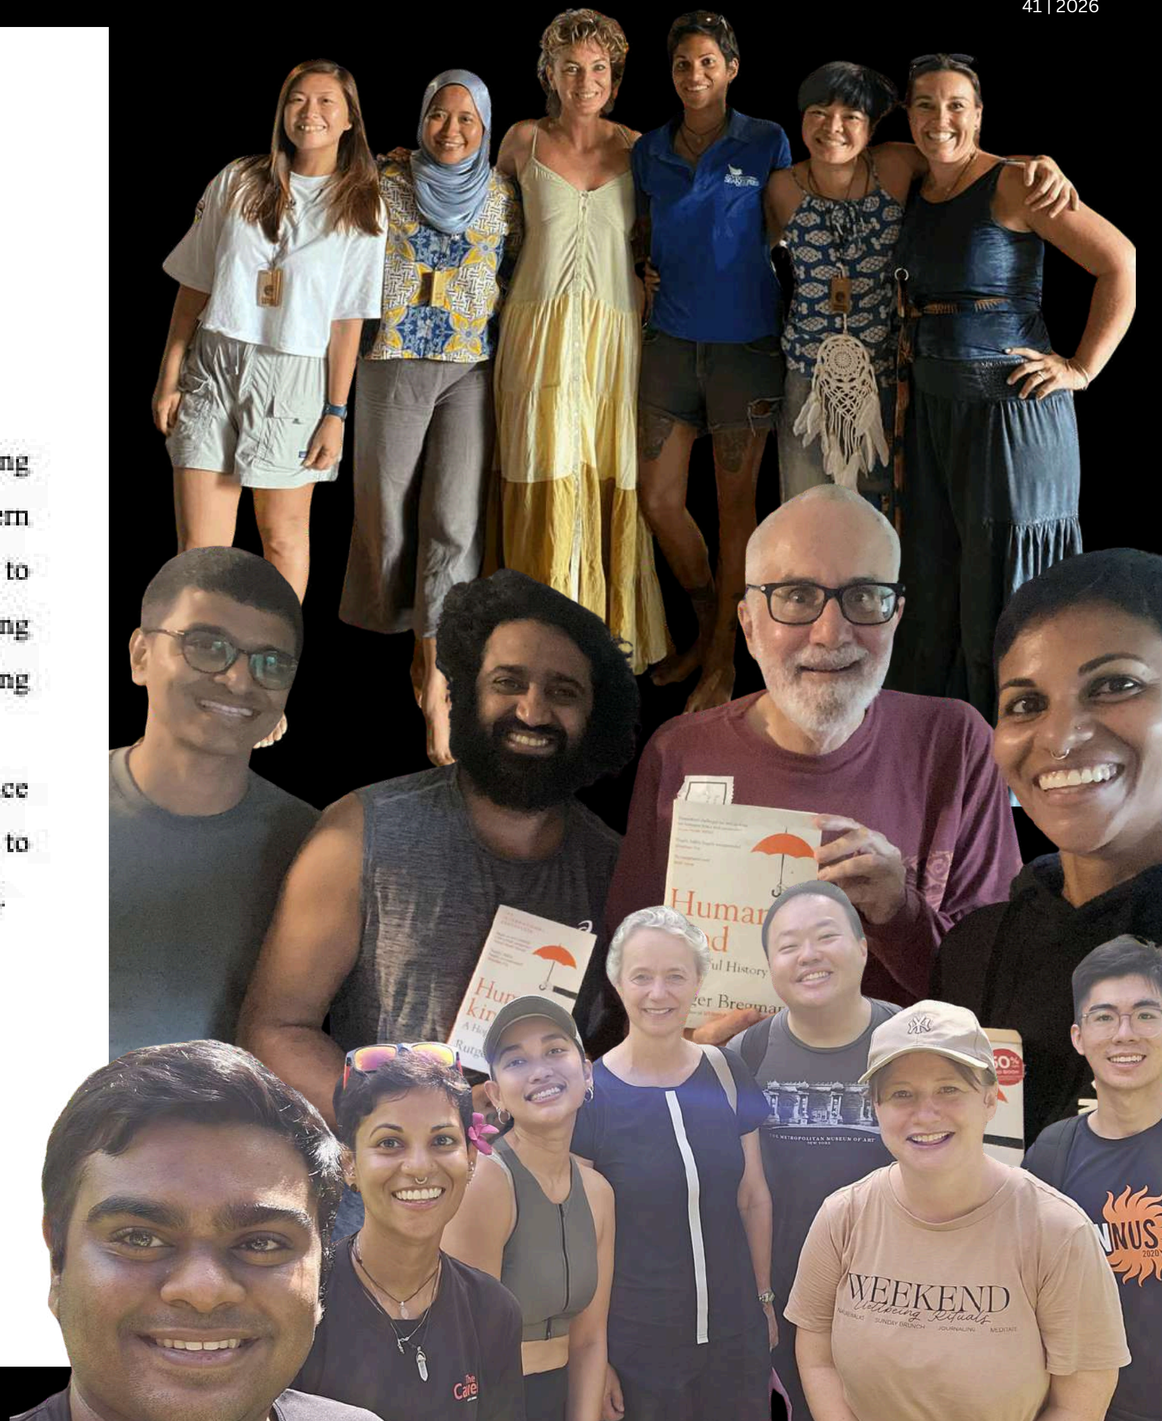

Subject: Testimonial for storytelling work on research project

I had the opportunity to work with The Eco Chapter, led by Marla Lise on the storytelling development of my research project, "Coral reef biodiversity conservation and connectivity in the southern Gulf of Thailand to support reef resilience and sustainable use". Her work demonstrated a strong ability to translate complex scientific research into clear, engaging, and well-structured narratives. The storytelling effectively captured the key messages of this project, making the content accessible without compromising scientific accuracy.

Her approach to science communication was both focused and impactful, highlighting the relevance of the research to broader audiences, including policy and community stakeholders. I would be pleased to recommend her for projects that require high quality science communication and narrative development.

Sincerely,

Assoc. Prof. Dr. Mathinee Yucharoen
Faculty of Environmental Management, Prince of Songkla University

Travel Light

Travel Light is a regenerative learning initiative for travellers, tourism organisations, and communities working at the intersection of travel, conservation, and environmental responsibility.

It combines workshops, reflective learning, storytelling, and impact feedback to support more thoughtful engagement with tourism, while helping organisations strengthen sustainability practices, communication, and community relationships.

We offer a clearer awareness of ethical travel practices, deeper visitor engagement, and improved organisational insight and storytelling that supports more responsible, long-term positive impact in tourism.

(Featured in a recent interview with Conscious Explorer.)

Looking to the Future

Our next project is to use the Agile methodology to help eco-centric brands become B Corp Certified.

We hope this creates a more accessible pathway for smaller purpose-driven companies doing meaningful work, but lacking the time, structure, or resources to navigate the certification process alone.

Start your B Corp Certification journey with us.

Certified

B

®

Corporation

Work with us

Futureproofing starts with understanding the world you're part of, not just operating within it.

The Eco Chapter builds environmental literacy so decisions are grounded in how systems actually work.

We help turn action into story so impact is visible, understood, and able to be built on.

The Eco Chapter

Empowering change through eco-literary activism

Marla is an inspiring individual whose passion and dedication to the sustainability sector is unparalleled to anyone else I have ever met in this space. This, combined with her high level of knowledge, ability to communicate professionally and with sincerity on all matters relating to such, makes her a formidable team member.

During our time of working together, Marla regularly displayed great initiative, taking it upon herself to host education seminars for our global team on matters relating to the world of sustainability. She was able to articulate this in a very relatable way, which hugely assisted team members that were new to this space. Marla made these sessions both interesting and information, interactive and fun.

In the fast paced start-up environment, agility and working with ambiguity are part of the territory. Marla was able to navigate this with professionalism and patience. She often leaned in to perform duties outside of her remit and gave input where she felt she could add value.

I thoroughly enjoyed working with this impressive individual.

Victoria Bethlehem
Group Human Resources Director
Education in Motion

Work With The Eco Chapter

Corporates & Organisations

- Communicate sustainability with greater clarity, credibility, and impact
- Turn technical ESG concepts into human-centred narratives
- Support staff engagement, training, and regenerative thinking
- Reduce greenwashing risks through scientifically informed communication
- Strengthen stakeholder trust and long-term organisational relevance

NGOs & Non-Profits

- Translate complex environmental issues into accessible public education
- Strengthen storytelling, outreach, and community engagement
- Create eco-literacy programmes, workshops, and curriculum
- Increase funding and partnership potential through clearer impact communication
- Build public trust through credible, science-grounded messaging

Educators & Schools

- Integrate sustainability and systems thinking into learning experiences
- Develop engaging eco-literacy curriculum and student programmes
- Support educators in communicating climate issues constructively
- Empower student leadership, critical thinking, and environmental awareness
- Create learning environments that inspire curiosity, care, and action

Hospitality & Tourism

- Communicate sustainability efforts authentically and credibly
- Create meaningful guest education and regenerative tourism experiences
- Train staff in sustainability awareness and environmental practices
- Avoid performative “eco” branding and reduce greenwashing risks
- Strengthen brand reputation through purpose-led storytelling
- Travel Light programme

Individuals & Mentoring

- Build eco-literacy and systems thinking
- Explore meaningful careers and purpose-led transitions
- Develop confidence in communicating sustainability and climate issues
- Move from climate anxiety and overwhelm into informed action
- Gain clarity, direction, and accountability for meaningful change

Start-Ups & Eco-Conscious Brands

- Develop authentic sustainability narratives grounded in real impact
- Translate environmental values into clear, engaging brand communication
- Create educational and storytelling content that builds audience trust
- Avoid greenwashing through science-informed messaging and transparency
- Strengthen brand identity, purpose, and long-term community engagement

Rates

You pay for time - per hour.
No frills. No gimmicks. No inflated overheads.
Just the rate of sufficiency.

Pricing is structured based on the type of client and scope of work, including preparation and delivery time.

We typically work across individual, NGO, and corporate rates, with pricing adjusted based on scale, complexity, and location.

This could look like:

Workshops and Trainings

1 hour delivery → 4–5 hours prep

Talks and Keynotes

1 hour delivery → 3–4 hours prep

Storytelling and Writing

1 hour delivery → 2–3 hours prep

Consulting

1 hour delivery → 1–2 hours prep

Moderation and Panels

1 hour delivery → 2–3 hours prep

Acknowledgements

The 206 members of The Eco Chapter WhatsApp community
The 182 subscribers to Substack
The 3140 followers on LinkedIn
The 1000+ workshop participants
The 250+ PPP attendees

And YOU!

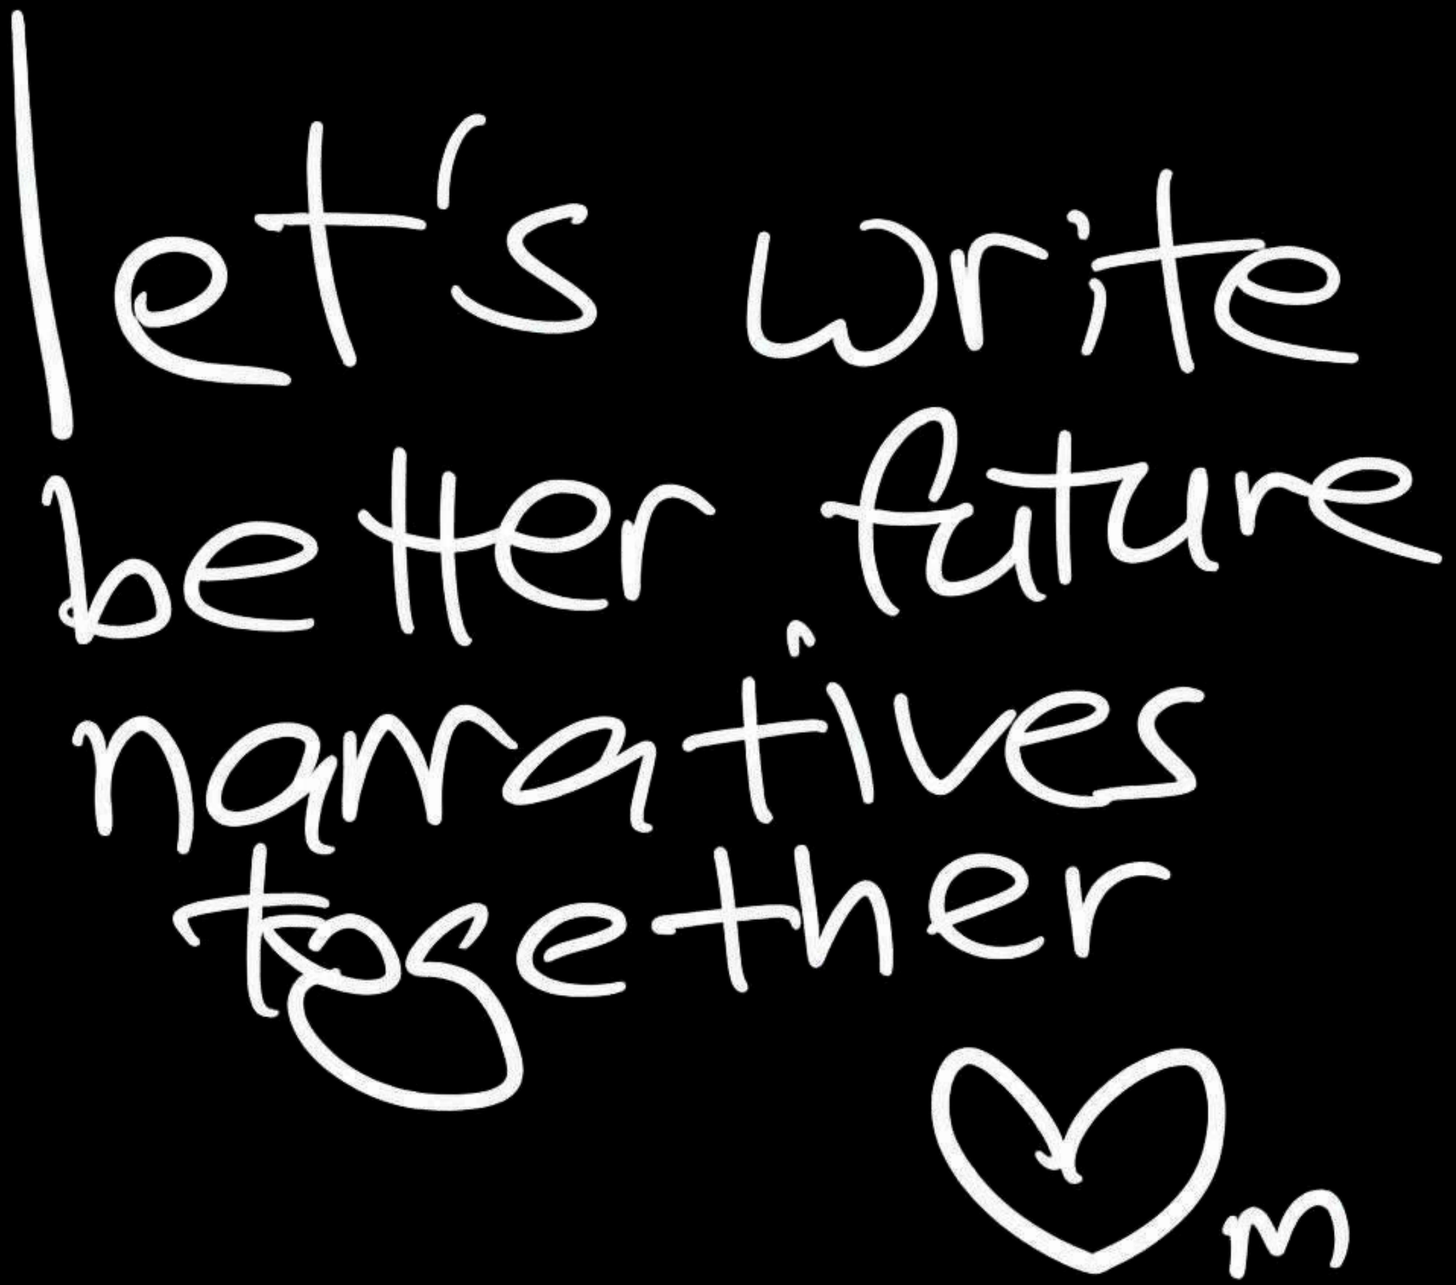

**“In the end we will conserve only what we love;
we will love only what we understand.”
- Baba Dioum**

**The Eco Chapter exists to bring as many people as possible into the conversation about the polycrisis,
so that together we can find ways to write better future narratives.**

We’re waiting for you to join us.

We hope this report is received as a human-made document, created in service of the planet and all its inhabitants.
